Additional Information

The details in this field are explanatory statements of scope and/or examples of possible contexts in which the NOS may apply; they are not to be regarded as range statements required for achievement of the NOS.

Note: Where an individual finds it difficult or impossible to express their own preferences and make decisions about their life, achievement of this standard may require the involvement of advocates or others who are able to represent the views and best interests of the individual.
Where there are language differences within the work setting, achievement of this standard may require the involvement of interpreters or translation services.

Active participation is a way of working that regards individuals as active partners in their own care or support rather than passive recipients. Active participation recognises each individual’s right to participate in the activities and relationships of everyday life as independently as possible.
The individual is the adult, child or young person you support or care for in your work.

Networks may be formal, which are often linked to national, regional and local organisations and agencies; or informal, that is, where more loosely knit networks are established within families, neighbourhoods or communities of shared interest to provide for particular support needs.

Others are your colleagues and other professionals whose work contributes to the individual’s well-being and who enable you to carry out your role.

Outcomes are planned outcomes designed to meet people’s assessed needs.

People may include individuals, families, carers, groups and communities.

Resources may include organisational resources: direct payments; organisations controlled by individuals using the services.
